

The Papuan Languages Of New Guinea

Author :William A Foley / **Category** :Foreign Language Study /
Total Pages : 305 pages

 [Download The Papuan Languages Of New Guinea PDF](#)

Summary : Free the papuan languages of new guinea pdf download - this introduction to the descriptive and historical linguistics of the papuan languages of new guinea provide an accessible account of one of the richest and most diverse linguistic situations in the world the papuan languages number over 700 or 20 per cent of the world s total in more than sixty language families less than a quarter of the individual languages have yet been adequately documented and in this sense william foley s book might be considered premature however in the search for language universals and generalisations in linguistic typology it would be foolhardy to neglect the information that is available in this respect alone the present volume systematically organised on mainly typology principles is particularly timely and useful in addition the processes of linguistic diffusion are present in new guinea to an extent probably paralleled elsewhere on the globe the papuan languages of new guinea will be of interest not only to general and comparative linguists and to typologists but also to sociolinguists and anthropologists for the information it provides on the social dynamics of language content
