Summary : Free ecological network and local authorities sociological instruments pdf download - ever closer links have been forged between caring for nature on the one hand and human activities on the other in recent years there has been a shift from an interest in reserve-based nature which excluded man and human activities to an increasingly powerful nature-culture relationship nature protection became nature conservation and then nature development with the integration of socio-economic and cultural aspects within the framework of the setting-up of the pan-european ecological network these sociological aspects have a great importance for establishing an ecological network where the scientific aspects of biodiversity protection must co-exist with nature management and development

Publisher : Council of Europe on 2002-01-01 / **ISBN** : 9287149968
