Summary : Free the un convention on the rights of persons with disabilities pdf download - the international convention on the rights of persons with disabilities is the first human rights treaty adopted by the united nations in the 21st century it seeks to secure the equal and effective enjoyment of human rights for the estimated 650 million persons with disabilities in the world it does so by tailoring gernal human rights norms to their circumstances it reflects and advances the shift away from welfare to rights in the context of disability the convention itself represents a mix between non-discrimination and other substantive human rights and gives practical effect to the idea that all human rights are indivisible and interdependent this collection of essays examines these developments from the global european and scandinavian perspectives and the challenge of transposing its provisions into national law it marks the coming of age of disability as a core human rights concern
