**Summary** : Free drawing louisiana s new map pdf download - during the past 50 years coastal louisiana has suffered catastrophic land loss due to both natural and human causes this loss has increased storm vulnerability and amplified risks to lives property and economies--a fact underscored by hurricanes katrina and rita drawing louisiana s new map reviews a restoration plan proposed by the u s army corps of engineers and the state of louisiana finding that although the individual projects in the study are scientifically sound there should be more and larger scale projects that provide a comprehensive approach to addressing land loss over such a large area more importantly the study should be guided by a detailed map of the expected future landscape of coastal louisiana that is developed from agreed upon goals for the region and the nation
