How can businesses and their shareholders avoid moral and legal complicity in human rights violations? This central and contemporary issue in the field of ethics, politics and law is of concern to inter-governmental organizations such as the UN, and to many NGOs, as well as investors and employees. In this volume legal scholars and political philosophers identify and address the intertwined issues of moral and legal complicity in human rights violations by companies and those who invest in them. By describing the legal aspects of human rights violations in the corporate sphere, addressing the complicity of companies with regard to such norms and exploring the influence of investors, the book provides a thorough introduction to corporate social responsibility. Human rights and corporate complicity will set the research agenda on socially responsible investment for years to come.
