

The Collapse Of The Eastern Mediterranean

Author : Ronnie Ellenblum / **Category :** History / **Total Pages :** 0 pages

 [Download The Collapse Of The Eastern Mediterranean PDF](#)

Summary : Free the collapse of the eastern mediterranean pdf download - as a medieval warm period prevailed in western europe during the tenth and eleventh centuries the eastern mediterranean region from the Nile to the Oxus was suffering from a series of climatic disasters which led to the decline of some of the most important civilizations and cultural centres of the time this provocative study argues that many well-documented but apparently disparate events - such as recurrent drought and famine in Egypt mass migrations in the steppes of central Asia and the decline in population in urban centres such as Baghdad and Constantinople - are connected and should be understood within the broad context of climate change drawing on a wealth of textual and archaeological evidence Ronnie Ellenblum explores the impact of climatic and ecological change across the eastern mediterranean in this period to offer a new perspective on why this was a turning point in the history of the Islamic world
