

Recent Trends In Multimedia Information Processing

Author : Panos Liatsis / **Category :** Computers / **Total Pages :** 592 pages

 [Download Recent Trends In Multimedia Information Processing PDF](#)

Summary : Free recent trends in multimedia information processing pdf download - this book reports on the state of the art in multimedia information processing the emphasis is on the convergence of information processing algorithms and associated technologies the areas of interest include video image coding color vision 3d reconstruction field programmable devices and many others contents selected topics in medical image processing j cornelis et al a restoration method for delay proportional differentiated services j tsiligaridis r acharya massive marching a parallel computation of distance function e dejno kov et al a novel intrusive voice transmission quality test system for mobile networks j holub et al fpad versus fpga for future mobile communications s a colsell r edwards nonuniform sampling of chrominance and its application to intra-frame coding m doma ski et al analytical design of 2-d fir filters for image compression p zahradnik m vlcek hmm-based dance gesture recognition f cheneviere et al a progressive wavelet oriented watershed technique for image segmentation d k bechtsis et al spiking neuron auditory model for speech processing systems a v ivanov et al focal region-based volume rendering j zhou k d toennies on the choice of transform for low frequency image watermarking d taskovski et al online classification of eeg signals using artificial neural networks for biofeedback training of patients with epilepsy m schroder et al data mining and telecommunication fraud detection using artificial neural networks a j hussain e chew large scale features in prokaryote and eukaryote genomics signals p d cristeia a basis of invariant moments for color images r bidoggia s gentili fast segmentation of color images using the fuzzy k-means algorithm and different sampling approaches a g yiannoulis et al and other papers readership graduate students academics and industrialists in image video coding multimedia neural nets and image analysis keywords image processing and analysis video coding neural networks bioinformatics field programmable devices fuzzy logic multimedia

Pusblisher : World Scientific on 2002-10-24 / **ISBN :** 9789814486927
