

Textile-led Design For The Active Ageing Population

Author : J McCann David Bryson / **Category :** Technology & Engineering / **Total Pages :** 574 pages

 [Download Textile-led Design For The Active Ageing Population PDF](#)

Summary : Free textile-led design for the active ageing population pdf download - despite the world's aging population, suitable clothing for the older community is a largely neglected area. This book considers the needs of the growing number of active older people and investigates how recent developments in textiles, fibres, finishes, design, and integrated technology can be deployed to serve this group and improve quality of life. Part I provides an understanding of the active ageing population by considering the group's experiences of and attitudes towards clothing and reviewing the barriers to their adoption of new wearable technologies. Part II focuses on the needs of the older population, including effective communication with designers and the age-related anatomical and physiological changes that designs should consider. Part III reviews design requirements and processes, and finally, Part IV reviews the manufacture of suitable apparel. With chapters on suitable textile fibres, balancing technology and aesthetics, and wearable electronics, this book summarises the wealth of recent research on attitudes to clothing amongst the active ageing population, looks into how their aspirations can be investigated, and appropriate apparel designed to meet their needs. It examines design and manufacturing issues, including ways of accommodating physiological changes with age and the use of wearable electronics.
