**Summary :** Free inhabiting isla nena 1514--2003 island narrations imperial dramas and vieques puerto rico pdf download - historicizing isla nena as an island-community inseparable from the multiple representations of its history exposes intersections of gender and empires of colonial fringes and imperial centers of memories and histories and of the historical making of vieques and the inner contradictions of puerto rico s colonial history i explore these intersections through an interdisciplinary lens merging historical and autobiographical genres meshed through the lives of four viequense women of which i am the last generation the tracing of my own viequense genealogy allows an approach to vieques through multiple narratives including personal memories and postmemories this interlacing of narratives also acknowledges my role as a weaver of historical narratives that bridge the abstract character of a long history with the intimacy of its ongoing significance for those like me who are part of this history
