Summary : Free to save everything click here pdf download - in the very near future smart technologies and big data will allow us to make large-scale and sophisticated interventions in politics culture and everyday life technology will allow us to solve problems in highly original ways and create new incentives to get more people to do the right thing but how will such solutionism affect our society once deeply political moral and irresolvable dilemmas are recast as uncontroversial and easily manageable matters of technological efficiency what if some such problems are simply vices in disguise what if some friction in communication is productive and some hypocrisy in politics necessary the temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behavior but when we change the motivations for our moral ethical and civic behavior we may also change the very nature of that behavior technology evgeny morozov proposes can be a force for improvement but only if we keep solutionism in check and learn to appreciate the imperfections of liberal democracy some of those imperfections are not accidental but by design arguing that we badly need a new post-internet way to debate the moral consequences of digital technologies to save everything click here warns against a world of seamless efficiency where everyone is forced to wear silicon valley s digital straitjacket
