Summary : Free recent advances in multidisciplinary applied physics pdf download - the 1st international meeting on applied physics aphys-2003 succeeded in creating a new international forum for applied physics in europe with specific interest in the application of techniques training and culture of physics to research areas usually associated with other scientific and engineering disciplines this book contains a selection of peer-reviewed papers presented at aphys-2003 held in badajoz spain from 15th to 18th october 2003 which included the following plenary lectures nanobiotechnology - interactions of cells with nanofeatured surfaces and with nanoparticles radiation protection of nuclear workers - ethical issues chaotic data encryption for optical communications
