Summary : Free catholicism and the roots of nazism pdf download - derek hastings here illuminates an important and largely overlooked aspect of early nazi history going back to the years after world war i--when national socialism first emerged--to reveal its close early ties with catholicism although an antagonistic relationship between the catholic church and hitler s regime developed later during the third reich the early nazi movement was born in munich a city whose population was overwhelmingly catholic focusing on munich and the surrounding area hastings shows how catholics played a central and hitherto overlooked role in the nazi movement before the 1923 beerhall putsch he examines the activism of individual catholic writers university students and priests and the striking catholic-oriented appeals and imagery formulated by the movement he then discusses why the nazis embarked on a different path following the party s reconstitution in early 1925 ultimately taking on an increasingly anti-catholic and anti-christian identity

Pusblisher : Oxford University Press on 2009-12-18 / **ISBN :** 9780199889242
