Summary : Free the open society in theory and practice pdf download - from june 28 until july 4 1972 a group of scholars all of them academicians committed to the critical study of man and society which may be called political theory met at the rockefeller foundation's villaserbelloni in bellagio italy to present papers on and discuss the subject of the open society these papers as revised are published here most of them for the first time they reflect no consensus of view nor were they intended to do so that such a consensus did not emerge from the conference is not in our judgment a cause for regret it may rather be regarded as a manifestation of a healthy and desirable plurality of approaches which itself indirectly tells us something important about the nature of the open society all the papers deal in different contexts and from a variety of philosophical and theoretical perspectives with the interrelated themes of openness and the open society some of the panelists are skeptical of the capacity of modern industrial or post-industrial society with its heavy emphasis upon technological rationality to foster authentic openness under currently prevailing assumptions about man and nature
