Summary : Free the kim jong il regime in north korea pdf download - much hyperbole surrounds the political regime in the democratic people s republic of korea dprk or north korea many analysts argue that north korea is a unique political system what kind of regime is the dprk and what kind of leader does it have a variety of labels are given to the north korean regime these include likening the regime to an organised crime family and to a corporatist organism there are certainly merits to each of these approaches but each has its limitations pyongyang does share some of the attributes of organised crime and certainly engages in criminal activity in a systematic and calculating manner this pattern of illicit behaviour includes the production and distribution of narcotics as well as the counterfeiting of foreign currencies cigarettes and pharmaceuticals but the dprk is more than a crime family -- it possesses a massive conventional military force as well as significant strategic forces moreover the regime continues to brainwash imprison or starve north koreans inflicting untold misery and death on its people corporatism meanwhile may provide insights into certain aspects of the system but its utility is limited by the confusion that surrounds understanding of this concept an absolute dictator still rules the regime
