Summary : Free processing technologies for the forest and biobased products industries pdf download - the deepwater horizon oil spill in april 2010 has shown us that increasing risks and costs have to be accepted to satisfy the increasing demand of material and energy resources from a worldwide perspective increasing the recovery of raw materials is one possibility but another one is increasing efficiency in processing and production therefore the development and improvement of processing technologies is a crucial factor for economic progression this book contains discussions from the 1st international conference on processing technologies for the forest and biobased products industries held in october 2010 at salzburg university of applied sciences kuchl austria the conference provided a forum for discussions among researchers producers and consumers of forest and biobased products and acted as a catalyst for new research on process technologies on quality control and process improvement and on new concepts for use by technical managers operations managers and business managers the book presents an overview of new developments in processing technologies in the forest and biobased products industries series austria forschung und wissenschaft - technik
