Representations Of Technology In Science Fiction For Young People

Author : Noga Applebaum / **Category :** Literary Criticism / **Total Pages :** 214 pages

 [Download Representations Of Technology In Science Fiction For Young People PDF](#)

Summary : Free representations of technology in science fiction for young people pdf download - in this new book noga applebaum surveys science fiction novels published for children and young adults from 1980 to the present exposing the anti-technological bias existing within a genre often associated with the celebration of technology applebaum argues that perceptions of technology as a corrupting force particularly in relation to its use by young people are a manifestation of the enduring allure of the myth of childhood innocence and result in young-adult fiction that endorses a technophobic agenda this agenda is a form of resistance to the changing face of childhood and technology s contribution to this change further applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children s complex yet pleasurable interactions with technology today the study looks at works by well-known authors including m t anderson monica hughes lois lowry garth nix and philip reeve and explores topics such as ecology cloning the impact of technology on narrative structure and the adult-child hierarchy while focusing on the popular genre of science fiction as a useful case study applebaum demonstrates that negative attitudes toward technology exist within children s literature in general making the book of considerable interest to scholars of both science fiction and children s literature

Publisher : Routledge on 2009-09-10 / **ISBN :** 9781135255176
