Summary : Free a critical history of contemporary architecture pdf download - this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 the first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world this book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects
