

## Hot Topics In Cell Biology

**Author :** Jose Becerra Leonor Santos-Ruiz / **Category :** Science  
**/ Total Pages :** 278 pages

 [Download Hot Topics In Cell Biology PDF](#)

**Summary :** Free hot topics in cell biology pdf download - summary this book is a definitive overview of the current state of the art in cell biology it is based on papers presented by leading researchers at the spanish society for cell biology s xiv congress - a congress that strives to achieve scientific excellence each participant was asked to prepare a mini review of current and likely future development in their area of research this book is based on those reviews as such it is therefore an analysis of current and future trends key features contains contributions from some of the world s leading researchers the book is multidisciplinary covering almost all topics in cell biology from basic to applied cell biology and a wide variety of models from in vitro to vivo models ranging from fish to rodents and humans each mini review is an easy-read piece describing the state of the art on a topic with clear language and in a summary format the mini review format makes the book attractive not only to readers involved in cell biology research and teaching but also professionals from other disciplines and students the book takes a truly multidisciplinary approach it covers a wide array of topics and the book reflects how cell biology interacts with other disciplines the editors jose becerra is professor of cell biology at the university of malaga spain since 1989 he has been dean secretary vice-dean and dean of the faculty of sciences of malaga and is now the head of the department of cell biology genetics and physiology from 2001 to 2003 he was the director of the andalusian laboratory of biology lab seville which was converted in the andalusian centre for developmental biology cabd under his term he is a member of the technical committee of the national stem cell bank since 2007 patron of the board of trustees of imabis foundation mediterranean institute for the advance of biotechnology and health research coordinator of the biomaterials and tissue engineering area of the the biomedical research networking center in bioengineering biomaterials and nanomedicine ciber-bbn and member of the direction committee of the ciber-bbn leonor santos-ruiz is senior researcher of the ciber-bbn network at the andalusian center for nanomedicine and biotechnology bionand she started her career studying the cellular and molecular basis of lower vertebrates amazing ability for tissue regeneration with a special attention to bone and spinal cord repair readership cell biology academics and researchers contents introduction dynamics of cell compartments the intracellular trafficking cell

signaling autophagy apoptosis and cell homeostasis cell biology  
of aging plant cell biology methods in cell biology applied cell  
biology cell biology of cancer cell therapies and tissue  
engineering neurodegeneration and cell biology  
nanotechnology and cell biology challenges and opportunities

**Publisher :** Chartridge Books Oxford on 2012-10 / **ISBN :**
