

Choosing Excellence In Public Schools

Author :David W Hornbeck Katherine Conner / **Category**
:Education / **Total Pages :** 300 pages

"The values, moral obligations, and strategies required to ensure that all students graduate from high school ready without remediation to access opportunity will take political will, a commitment to equity, and systemic thinking about how to improve whole systems of schools and not settle for a few more good ones. Hornbeck draws on successful results from research, policies, and practice to make a compelling case for what must be done to improve school districts and schools, and the necessary steps to do so for all children." —**Thomas Payzant**, professor of practice, Harvard Graduate School of Education, and former assistant secretary, U.S. Department of Education and Superintendent, Boston and San Diego

"As a former member of Congress, I believe that *Choosing Excellence in Public Schools* is a must-read. Based on his forty years of practical experience, data, and common sense, Hornbeck spells out what policymakers need to do to make education work for all children. In addition, as president of Common Cause, I am pleased that this book provides powerful reasons about why delivering a quality education to every child is the responsibility of all Americans, not just parents and educators. It is the cornerstone of democracy and it is the right thing to do! Hornbeck tells us how we can act by sharing his own successful experience in building grassroots advocacy efforts." —**Bob Edgar**, president of Common Cause, and former general secretary, National Council of Churches

"David Hornbeck reminds us that an abiding, unshakeable belief that all kids can learn is an essential prerequisite for a successful educational strategy. This compelling/must-read work details an experience-based roadmap on how to convert this aspiration into a reality. This book is about the power of advocacy, the setting and meeting of high standards, and overcoming the obstacles to education reform." —**Raul Yzaguirre**, presidential professor, Arizona State University, and president/CEO emeritus, National Council of La Raza

"*Choosing Excellence in Public Schools* is chock full of evidence on the steps our schools must take to enable all of our children to participate fully in mainstream American society. Whether you're an educator or simply an interested citizen, it's worth reading for that. But Hornbeck and Conner's most important contribution may not be in their recipe to broaden academic success, but, rather, in their analysis of why—even after more than two decades of 'reform'—we still aren't
