Summary : Free going back to the future pdf download - it was edmund burke the british statesman and philosopher who said that those who don t know history are destined to repeat it in this book at least as far as educational leadership is concerned robert palestini helps ensure that we do not fall into the trap of ignoring history dr palestini rightly points out that effective leaders have been utilizing the same leadership behavior for centuries he uses this evidence to support the perennial and lasting impact of situational leadership theory which posits that no single way of leading works in all situations rather appropriate leadership behavior depends on the circumstances at a given time for centuries effective managers have been diagnosing the situation identifying the leadership style or behavior that will be most effective and then determining whether they can implement the required style at the turn of the last century the editors of life magazine identified the 100 leaders who they believed had the most impact of the global society during the second millennium using this list as a backdrop palestini chose ten of the twentieth century individuals on the list to explore what it was about their respective leadership behavior that allowed them to have such a significant and lasting impact on our society when we examine the leadership behavior of the ten great leaders profiled in this book we will most certainly find that the most effective of them operated out of all five leadership frames--the lesson learned being that if one wishes to hone one's current leadership skills or become a future leader one can learn to do so by reflectively looking to the leaders of the past
