Calling All Fractions, Decimals, and Percents!

Overview of Activity

- Students will divide individual Hershey'sⁿ chocolate bars or paper replicas into fractions. Then they will
- Students will use base-ten blocks to show fraction
- Students will create designs on a drawn representation of the hundreds flat following directions to fill in
- ➤ Students will play games that compare fraction, percent,

w This Strategy Benefits Student

- Above-grade-level students benefit from CRA because the assignments are carefully crafted so that conceptual learning can be addressed.
- On-grade-level students benefit from CRA assignme because each stage of instruction builds on previous instruction and thus promotes student learning.
- CRA assignments help below-grade-level students because they get to do the problem using concrete models and see the problem using representations, before they are asked to solve the problem using abstract symbols.
- Using CRA assignments with English language learners helps them develop the mathematical language skills needed to solve problems because they work with concrete and representational models of a problem before dealing with abstract symbols and language.

Learning Standards

- Students will demonstrate an understanding of equivalent forms of basic percents, fractions, and
- Students will understand the relative magnitude and relationships among whole numbers, fractions,
